

Dear PPHE Hotel Group Recruitment Team,

I am writing to express my interest in the internship within the Finance Department as referenced in Job Reference: REQ9736. As a student pursuing a degree in Computer Science at the University of Amsterdam with a strong interest in automation and process optimization, I am enthusiastic about the opportunity to contribute to and learn from PPHE Hotel Group's innovative approach in the hospitality sector.

My educational background has equipped me with strong knowledge and programming skills in Python, SQL, JavaScript, and C#. I am also particularly excited about the opportunity to support and develop automated processes in Blue Prism and Microsoft Power Automate.

In addition to my technical capabilities, my project experience has been instrumental in developing my problem-solving and process optimization skills. I have been the lead developer of a project called AUSee ([www.ausee.courses](http://www.ausee.courses)), an active web application for university course selection guidance. Experiences like this have honed my abilities in creating efficient, user-centric solutions and has given me a deep understanding of the importance of optimizing processes for better performance and user experience.

My curriculum at university has taken me through various courses such as Machine Learning, Data Structures and Algorithms, and Advanced Programming which I believe are highly relevant and would be beneficial for this role.

I am keen on joining PPHE Hotel Group to further develop my skills and contribute to your esteemed company. I am excited about the prospect of working in an environment that values personal and professional development, and I am ready to bring my blend of technical expertise and creative problem-solving to your team.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and interests align with the dynamic work at PPHE Hotel Group.

Best regards,

Ovindu Randunu Chakrawarthige
